## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Notices & Remarks*

1. Applicant's amendment file on 03/30/2004 in response to Examiner's Office Action has been reviewed. The following rejections now apply.
2. Claims 1-26 are pending for the examination.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 19, 21, 23 and 25 are rejected under 35 U.S.C. 102(e) as being anticipated by Saiki et al. (U.S. Pat. No. 5,953,513).

As to claims 19, 21, 23 and 25, Saiki teaches and method and apparatus to interface digital audio data for a rewritable optical disk driver, comprising: first sending or receiving a start signal, signaling to start a data transfer operation, through an AT attachment packet interface (ATAPI) protocol bus; second sending or receiving a conversion start signal, signaling to convert data into a format for transfer over the bus, through a connection other than the bus; and receiving data through the bus in accordance with the start signal and the conversion start signal (see col. 7 line 49 to col. 8 line 10 and col. 9 lines 17-25).

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 20, 22, 24 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Saiki further in view of Yasui (U.S. Pat. No. 5,999,505).

As to claims 20, 22, 24 and 26, Saiki fails to explicitly to teach the start signal and the conversion start signal at substantially the same times. Yasui; however, teaches sending or receiving the start signal and the conversion start signal at substantially the same times (see col. 10 lines 8-20). It would have been obvious to a person of ordinary skill in the art to have the start signal and the conversion start signal at substantially the same times in order to provide saving time.

***Allowable Subject Matter***

7. Claims 1-18 are allowed.

***Response to Arguments***

8. In response to the applicant's arguments that the methods and apparatuses recited in claims 19, 21, 23 and 25 also effectively bypasses the lengthy preparation processes. Examiner respectfully disagrees it because nowhere in claims 19, 21, 23 and 25 discloses the bypass of the preparation process.

***Conclusion***

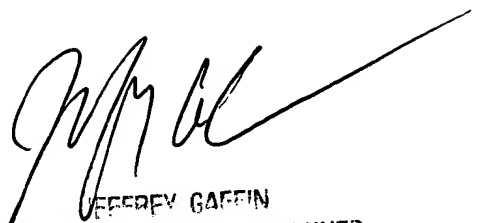

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mike Nguyen whose telephone number is 703 305-5040. The examiner can normally be reached on 8:00AM-4:30PM.
